1. A $3.9 billion fragmented African export timber market, ready for consolidation

2. Woodbois is one of the few integrated timber producers and traders in Africa

3. New management and fresh equity provided since 2017 ignited Woodbois’ growth strategy

4. Capital expenditure focused on maximizing returns from high margin production assets

5. Team and technology in place to leverage Woodbois’ trading business via trade finance

6. Ambition and ability to achieve industry leadership status in medium term
Company Overview

Woodbois Limited, is a forestry and timber company involved in the production, processing, manufacture and supply of sustainable African hardwood and hardwood products.

Since 2017, the new management team refined the overall group structure from c60 companies to now c15. **Non-core businesses were sold off and proprietary in-house systems implemented**

> c.400,000ha of forestry concessions in Gabon and Mozambique

**Significant asset investment** including a veneer factory completed and best-in-class processing equipment installed at sawmill.

The Company has **raised c$12m of receivables and inventory financing from both institutional investors** and HNW individuals.

The Company has grown revenues from $0.6m in 2016 to c$20m in 2019.

The current market cap of Woodbois, as of Feb 2020, is GBP27m (5.41GBP/share) with the directors of the business holding c13% of the total Company.

---

### Asset Overview

**Production Assets**

**Capacity**

**Gabon**

- **Sawmill & Kiln**
  - Sawmill - 2,000m³ per month
  - Kilns - 2,000m³ per month

- **Veneer Factory**
  - 2,000m³ per month

**Mozambique**

- **Sawmill**
  - 1,000m³ per month
Management Team

Paul Dolan – CEO
Paul held senior management positions at Barclays, DE Shaw and Nomura prior to joining Woodbois. Paul has consistently built award winning, world-class teams employing technology to manage substantial pools of human and financial capital across a diversified group of asset classes ranging from fixed income and equity derivatives to forestry.

Zahid Abbas – Head of Trading
Zahid has over 20 years’ experience in the timber business, formerly working for DLH Group in roles spanning procurement in Africa, sourcing Brazilian hardwood for French manufacturers and implementing and reinforcing the Group’s environmental policy.

Carnel Geddes – CFO
Carnel is a chartered accountant and certified fraud examiner, dually qualified in the UK and South Africa. During a 15-year career at BDO, the global audit, tax and advisory group, Carnel served as director, forensic services, of BDO London and partner of BDO Cape Town. She has been a director and board member of the largest South African pomegranate farm company, Pomona, since 2008.

Jacob Hansen – COO
Jacob has been in the timber business for more than 30 years. He worked in DLH Group before joining in 2005 where he held various international sales and procurement roles based in France, the Middle East and Africa (Gabon, Cameroon) selling lumber produced in West Africa.

Hadi Ghossein – Deputy Chairman
A former diplomat and a Gabonese citizen, Hadi manages the operations in Gabon. He has 25 years experience of managing forestry assets. Hadi has a trusted network of managers across each division in Gabon.

Ashkan Rahmati – Corporate Dev & Strategy
Ashkan has c10 years of investment banking and private equity experience in Africa and the Middle East. Prior to Woodbois, Ashkan was a part of the private equity team at CDC overseeing investments across Africa.

Source: (1) 2012-2018 FAOSTAT (as of Feb 2020). Projects based on management’s assumption of growth at *12-18 CAGR*
Between Q3 2018 and Q4 2019 the Company has recorded consistent revenue growth.

2019 saw disruption in our own production business due to the installation of machinery and in-house kilns.

The Company expects further growth in 2020 as the machinery installed hits capacity and the Woodbois brand is further established within the global timber market.
Woodbois has a diversified customer base, in 2019 the Business sold to c40 different countries.

East Asia remains a small portion of the business, there is significant demand from China, Taiwan and Korea for the Company’s timber.

The Company is seeing a growth in demand for stock from countries in North Africa and Europe.

3rd party supply also remains diverse with only Ivory Coast marginally above 25% for 2019.

Liberia and the Republic of Congo were a very small % of the Group’s supply in 2019, the Business expects significant growth going forward from these countries.
Established processing business in Gabon augmented by new kilns and sawmilling equipment in 2019

Overview

- Woodbois has been active in the Gabonese forestry sector for the last 25 years
- With over 95,000ha of forestry under management WoodBois Gabon is a significant player in the Country
- The Company owns significant harvesting equipment, a sawmill factory with kiln capacity as well as a veneer factory. All located in and around Mouila

Location

- The sawmill and veneer factory are both located in Mouila, c50km away from our forestry concessions
- The close proximity of WBG assets to the forest is a major competitive advantage that separates us from our competitors who locate their production assets in Libreville
- This lowers transport and salary costs whilst also providing local benefit- creating jobs in a less developed area of the Country
Sustainable harvesting is at the core of the Woodbois business model

**Sustainable harvesting with low impact in the forest**

Forest management plans are developed in partnership with local communities and approved by multiple government agencies.

Harvesting plans are based on a 23 year rotation cycle. Via the forest management plan – Woodbois begins to harvest a section of its concession area for a period over 3 years – after this period the same area cannot be touched for 20 years.

These plans ensure the selective cutting of commercial species, by quantifying and locating relevant trees allowing for low-impact logging plans.

**Key Takeaways**

- c.2-3 trees harvested per hectare
- 16,000ha of conservation area
- Only trees between 70cm and 135cm in diameter can be harvested
- Largest formal employer in Mouila, Gabon
- Providing manufacturing jobs in predominantly raw-material exporting country

16,000ha of conservation area
Woodbois has established infrastructure to capture a significant part of the value chain in Gabon.

- **95,000ha Forestry concessions**
- **Sawmill**
- **Air Dried**
- **Kiln Dried** (Woodbois facilities located by sawmill)
- **Veneer factory**
- **Short term Storage** (Cost per m³)

Once the goods are packed, we sell the products into our extensive customer network across the Globe.

**Own Production** → **Trading Business**
Overview of Forestry Business - Mozambique

Overview

> c300,000 hectares on renewable leases held by Argento Mozambique, the operating entity in the Country

> The forests contain hardwood species suitable for furniture and hardwood flooring

> In 2018, opened a brand new, state of the art sawmill in Nampula
  > Uses WoodMizer milling equipment

> During the course of 2018, the Mozambican government implemented an export ban on timber to combat the rampant illegal logging that was occurring in the country. This was lifted in late 2018

> The business is currently under care and maintenance with a limited harvesting schedule

> The Company continues to look for ways to monetize and create value in the business with multiple revenue streams both domestic and international being explored
  > Rovuma LNG project expected to attract c$30bln of investment
  > Investments related to the liquefied natural gas megaprojects include a "gas city" to house 150,000 inhabitants. Works requiring timber as a construction material have already started

> The Company has a comprehensive training program in place that has employed up to c300 staff locally (between harvesting and saw milling operations

> The Mozambique business actively engages in a reforestation programme

</tr>
</thead>
</table>
| Spanish Cedar / Dabema | • Sourced from Woodbois’ suppliers across Ivory Coast  
• Kiln dried in own facilities  
• Sold globally with particular interest in North America                                                                                                                                 | 15-20%            | 1,000m³ (current drying capacity, can be increased) | 5-6 months |
| Prepaid Timber Trades | • Woodbois pre-pay trusted, consistent suppliers for their timber  
• Higher margin than back to back trades, but longer cash cycle                                                                                                                                 | 8-12%              | n/a              | Limited by Trade Finance c.2-3 months |
| ‘Back to Back’ Trades | • Fast turn-around trades but low margin  
• Only pay supplier when timber is on the ship  
• Not constrained by production capacity                                                                                                                                                               | 4-8%                | n/a              | Limited by Trade Finance 30-60 days |
Alongside profitability, sustainability and traceability remain key to our strategy.

> Traceability and sustainability are within the DNA of the Woodbois business model.

> The 47 page Woodbois Sustainability Report aims to be informative, enhance transparency and provide data relating to the economic, environmental and social impacts of our operations.

> The Zoological Society of London ranks timber companies by the level of transparency of their operations – Woodbois was ranked 7th out of 100 players alongside much larger players.
Key inflexion point for a Company well placed in an increasingly important sector

**Capex spend in 2019 allows for significant margin expansion in 2020**
- The equipment purchased through 2019 gives the Company the ability to increase the recovery of logs to sawn timber as well as simplifying the logistics process, in turn lowering costs
  - Allows for the Company to significantly increase margin within the production business

**Professional & motivated management team in place**
- Complimentary skillsets across the management team
  - A combination of timber expertise and significant network both in Africa and globally alongside strong financial and technical capabilities

**Increasingly prominent role in the sustainable timber space, a key climate change mitigation sector**
- Woodbois has an increasingly important role to play in the sustainable timber space as an example of a sustainable, commercially successful African forest manager
  - Well positioned to partner with large corporates (e.g. oil and gas majors) to provide climate change mitigation opportunities such as large-scale tree planting schemes

**Platform in place to scale to multiple geographies**
- Woodbois has developed a powerful supplier network that allows the Company to be an early-mover in acquiring and managing assets in other countries
  - Platform and tailor-made strategy in place to minimize execution risk when capital is in place to expand the production business in other geographies

**Application of technology to capitalize on opaque market**
- Woodbois has developed proprietary technology to address a huge opportunity within the timber trading sector
  - Software allows for in-house benchmarking, tracking and aggregating of supply, demand and pricing information within an opaque market
